in rohit-kumawat-765362243

Objective

Seeking a challenging and dynamic opportunity to leverage my strong foundation in programming and development skills within an esteemed organization

Education

- **Sri Balaji College of engineering and technology jaipur** 2020-2024
B.Tech (computer science & engineering)
9.27 Aggregate CGPA
- **Rajasthan board of secondary education** 2020
Higher education (12th)
79.60%
- **Rajasthan board of secondary education** 2018
Secondary education (10th)
74%

Skills

- HTML
- Css
- Javascript
- Bootstrap
- Python
- Django
- WordPress

Projects

- **Car management back-end system using python**
A car management back-end system is a Python-based software project designed to streamline and automate various aspects of car-related operations. This system typically includes features like vehicle registration, maintenance scheduling, inventory tracking, and user management.
- **IOT Based Smart plant monitoring system**
An IoT-based smart plant monitoring system uses sensors to track soil moisture, temperature, and light. Data is sent to the cloud for real-time monitoring via a mobile app, providing alerts and automating care to ensure optimal plant health.
- **Frontend traveling website**
A frontend for a travel website offers an intuitive interface for booking flights, hotels, and activities, with user-friendly navigation and responsive design for seamless browsing on any device.

Achievements & Awards

- Certificate of website development with HTML, css from engineer core IIT Allahabad
- Certificate of web developer in beta digital services (Jaipur)
- Certification of website development with internshala
- Certification of python programming language with besant technology
- Certification of python Django with SBCET (Jaipur)

Internship

- Web developer
Beta digital services, jaipur
- Internshala
Website development course
